Contents

Vol. 34
No. 1
February 1982

C. NICOLIS: Stochastic aspects of climatic transitions—response to a periodic forcing 1
R. BENZI, G. PARISI, A. SUTERA and A. VULPIANI: Stochastic resonance in climatic change 10
D. BLAAUBOER, G. J. KOMEN and J. REIFF: The behaviour of the sea surface temperature (SST) as a response to stochastic latent- and sensible heat forcing 17
G. E. HUNT: On the sensitivity of a general circulation model climatology to changes in cloud structure and radiative properties 29
R. GROTJAHN: Stability properties of mean flows with turning 39
J. P. GUIRAUD and R. Kh. ZEYTOUNIAN: A note on the adjustment to hydrostatic balance 50
T-C. CHEN: On the kinetic energy budget of the summer-mean flow at 200 mb in the tropics 55
T-C. YIP and H-R. CHO: Dynamics of quasi-geostrophic systems with cumulus convection 63
M. C. GRANT and W. M. LEWIS JR.: Chemical loading rates from precipitation in the Colorado Rockies 74

Short Contributions

H. VON STORCH: Comparison of a sequence of model generated 500 mb-topographies with climate 89
R. C. SCHNELL and S. N. TAN-SCHNELL: Kenyan tea litter: a source of ice nuclei 92

Vol. 34
No. 2
April 1982

B. SALTZMAN: Stochastically-driven climatic fluctuations in the sea-ice, ocean temperature, CO_2 feedback system 97
D. K. PURNELL: Stochastic simulation of the atmosphere with localized precision 113
A. H. WOODCOCK: Fog inception in strong salt-laden marine winds 127
K. ROZANSKI and C. SONNTAG: Vertical distribution of deuterium in atmospheric water vapour 135
K. ROZANSKI, C. SONNTAG and K. O MÜNNICH: Factors controlling stable isotope composition of European precipitation 142
L. T. KHEMANI, G. A. MOMIN, M. S. NAIK, R. VIJAYAKUMAR and BH. V. RAMANA MURTY: Chemical composition and size distribution of atmospheric aerosols over the Deccan Plateau, India 151
D. R. CRONN and W. NUTMAGUL: Analysis of atmospheric hydrocarbons during winter MONEX 159
J. T. PETERSON, W. D. KOMHYR, T. B. HARRIS and L. S. WATERMAN: Atmospheric carbon dioxide measurements at Barrow, Alaska, 1973–1979 166
P. J. MULHOLLAND and J. A. WATTS: Transport of organic carbon to the oceans by rivers of North America: a synthesis of existing data 176
G. WALIN: On the relation between sea-surface heat flow and thermal circulation in the ocean 187

Short Contributions

L. ANDERSSON, B. RUDELS, and G. WALIN: Computations of heat flux through the ocean surface as a function of temperature 196

E. MÆLAND: A note about unsteady currents over a continental shelf . . . 199

J. R. HUMMEL: Surface temperature sensitivities in a multiple cloud radiative-convective model with a constant and pressure dependent critical lapse rate 203

Vol. 34
No. 3
June 1982

EDITORIAL 209

G. K. VALLIS: A statistical-dynamical climate model with a simple hydrology cycle 211

E. ELIASEN: Climate modeling using an equivalent meridional circulation . . 228

T. P. CHARLOCK: Cloud optical feedback and climate stability in a radiative-convective model 245

E. KÄLLÉN: Bifurcation properties of quasi-geostrophic, barotropic models and their relation to atmospheric blocking 255

T. SASAMORI: Baroclinic instability of a midlatitude zonal mean state changing with time 266

E. MESZAROS: On the atmospheric input of sulfur into the ocean 277

C. T. DRISCOLL and G. E. LIKENS: Hydrogen ion budget of an aggrading forested ecosystem 283

R. W. GARVINE: A steady state model for buoyant surface plume hydrodynamics in coastal waters 293

Short Contribution

E. BUCH: On entrainment observed in laboratory and field experiments . . . 307

ERRATUM 312

Vol. 34
No. 4
August 1982

A. RUIZ DE ELVIRA and P. LEMKE: A Langevin equation for stochastic climate models with periodic feedback and forcing variance 313

M. SANKAR-RAO, G. DALU and R. C. LO: Sensitivity of the boundary layer energy fluxes to forcing parameters in a simple climate model 321

G. BROWNING and H.-O. KREISS: Initialization of the shallow water equations with open boundaries by the bounded derivative method . . . 334

A. M. BRATSETH: A simple and efficient approach to the initialization of weather prediction models 352

M. MAK and C.-Y. J. KAO: An instability study of the onset-vortex of the south-west monsoon, 1979 358

A. S. MASON, G. HUT and K. TELEGADAS: Stratospheric HTO and ^{95}Zr residence times 369

D. W. T. GRIFFITH: Calculations of carrier gas effects in non-dispersive infrared analyzers. I. Theory 376

D. W. T. GRIFFITH, C. D. KEELING, J. A. ADAMS, P. R. GUENTHER and R. B. BACASTOW: Calculations of carrier gas effects in non-dispersive infrared analyzers. II. Comparisons with experiment 385

A. J. CRANE: The partitioning of excess CO_2 in a five-reservoir atmosphere-ocean model 398

Short Contribution

P. G. PRICE and N. NICHOLLS: Southern hemisphere energetics: a reappraisal of some earlier estimates 406

Vol. 34
No. 5
October 1982

D. P. BAUMHEFNER and D. J. PERKEY: Evaluation of lateral boundary errors in a limited-domain model 409

S.-U. PARK and D. N. SIKDAR: The evolution of a sub-cloud layer structure associated with a severe storm—A case study 429

L. BENGTSSON, H. BÖTTGER and M. KANAMITSU: Simulation of hurricane-type vortices in a general circulation model 440

D. R. JOHNSON and W. K. DOWNEY: On the energetics of open systems . . 458

H. ØKLAND: On the application of quasi-geostrophic equations to wind-driven barotropic currents in seas of moderate depth 471

M. KOGA: Bubble entrainment in breaking wind waves 481

P. J. MULHOLLAND and J. W. ELWOOD: The role of lake and reservoir sediments as sinks in the perturbed global carbon cycle 490

M. M. BENDER and A. J. BERGE: Carbon isotope records in Wisconsin trees . 500

Vol. 34
No. 6
December 1982

E. N. LORENZ: Atmospheric predicability experiments with a large numerical model 505

E. ELIASEN and L. LAURSEN: A seasonal global climate model with an equivalent meridional atmospheric circulation 514

K. D. MIN and L. H. HORN: Available potential energy in the northern hemisphere during the FGGE year 526

H. SAVIJÄRVI: The mass balance in diagnostic studies: an example of analysed and forecast data calculations 540

B. PINTY and H. ISAKA: Analysis of the diurnal oscillation of surface geostrophic wind over Western Europe 545

P. H. RUSCHER and J. W. DEARDORFF: A numerical simulation of an atmospheric vortex street 555

S. M. JOFFRE: Assessment of the separate effects of baroclinicity and thermal stability in the atmospheric boundary layer over the sea 567

L. MAHRT and S. LARSEN: Small scale drainage front 579

W. H. RAYMOND and H. L. KUO: Simulation of laboratory vortex flow by axisymmetric similarity solutions 588
